

# Machine Translation

TEAM F - TONEKO

## NEURAL BASELINE

WORKING WITH  
~19.000.000 SENTENCE  
LANGUAGE PAIRS.

AS A RESULT, WE GOT 35.97 BLEU  
POINTS ON THE SHARED DEV SET.

## ERROR ANALISYS

WE MANUALLY  
ANALYZED 40  
BASELINE  
TRANSLATIONS.

OUR MAIN OBSERVATION WAS THAT  
THE SYNTACTIC STRUCTURE WAS  
NOT FULLY CORRECT, SO WE TRIED  
TO IMPROVE ON THIS ASPECT.

## FINAL SYSTEM

IN ORDER TO THE  
ISSUES FOUND, WE  
WANTED TO INSERT  
STANDFORD CORENLP.

WE HAD LOTS OF PROBLEMS SO WE  
COULD NOT FINISH IT.
